

CAMPAIGN TO **STOP** KILLER ROBOTS

Ban support grows, process goes slow

Momentum to prohibit weapons that would select and attack targets without further human intervention is building rapidly while a multilateral process to discuss the weapons proceeds, but at a lacklustre pace. This week five countries called for a preemptive ban on fully autonomous weapons systems during the third Convention on Conventional Weapons (CCW) meeting on the matter: Algeria, Chile, Costa [...]

Norwegian fund considers killer robots

MARCH 19, 2016

[» CCW](#)[» COMPANY](#)[» DAVOS](#)[» NEWS](#)[» PANEL](#)

The challenge of killer robots is firmly on the agenda in Norway, where the ethics council of the \$830 billion Norwegian Government Pension Fund Global has announced it intends to begin monitoring companies investing in the potential development of fully autonomous weapons systems. Ethics council chair Johan H. Andresen said the aim is to see if such investments would be contrary to [...]

UN rapporteurs call for ban

MARCH 9, 2016

[» CCW](#)[» GENEVA](#)[» HEYNS](#)[» LAW](#)[» PRESENTATION](#)[» UN](#)

Today at the Human Rights Council in Geneva two high-ranking UN experts issued a new report that includes a call to ban fully autonomous weapons. Previous UN reports issued in 2013 and 2014 called for a moratorium on these weapons, which would function autonomously without human control or intervention. The Campaign to Stop Killer Robots invites [...]
