# SAP S/4HANA

## The next-generation ERP business suite

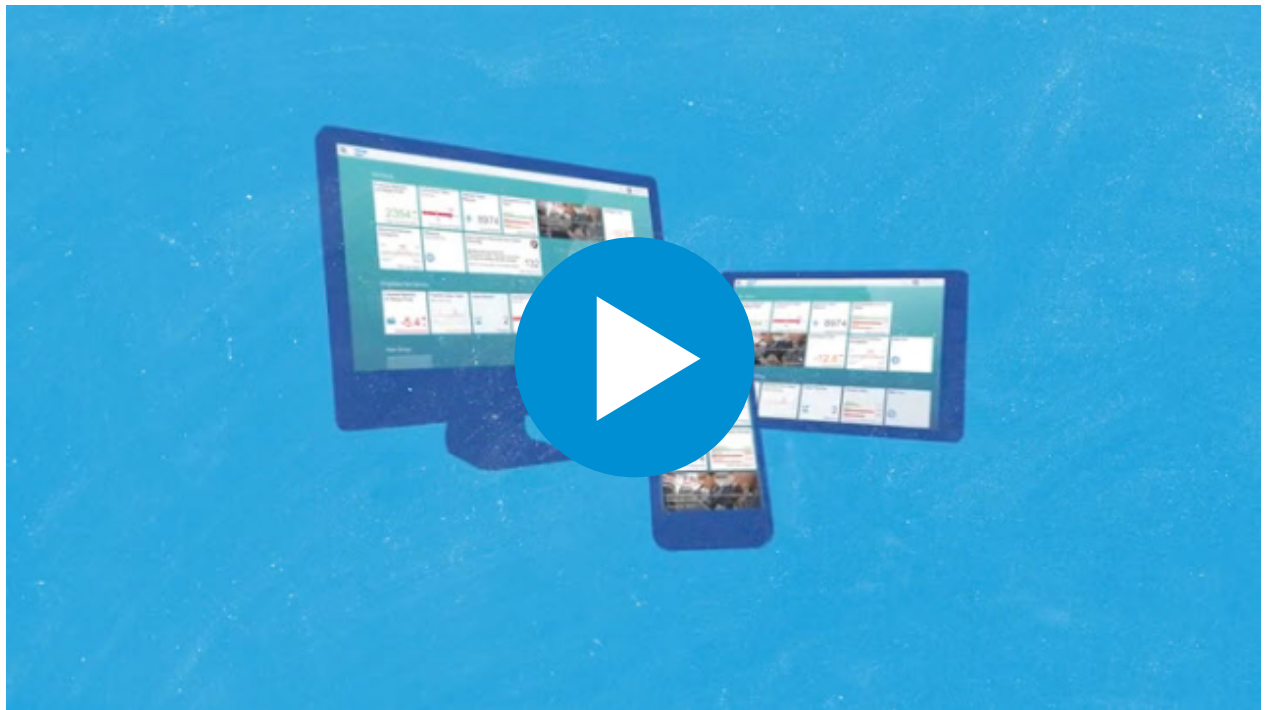

Run a truly live business with SAP S/4HANA – an in-memory ERP suite that acts as the “digital core” of your entire enterprise. SAP S/4HANA supports the Internet of Things (IoT), Big Data, real-time analytics, mobile, business networks, third-party systems, and more. It is immediate – empowering business users with insights to act in the moment. It is intelligent – going beyond automation to provide predictive suggestions. And it is integrated – not only among your departments, but with the world.

# What is SAP S/4HANA?

## SAP S/4 HANA

SAP S/4HANA is a real-time ERP suite for digital business. It is built on our advanced in-memory platform, SAP HANA, and offers a personalized, consumer-grade user experience with SAP Fiori. Deployable in the cloud or on-premise, SAP S/4HANA can drive instant value across all lines of business – no matter your industry or business size.

# Immediate. Intelligent. Integrated.

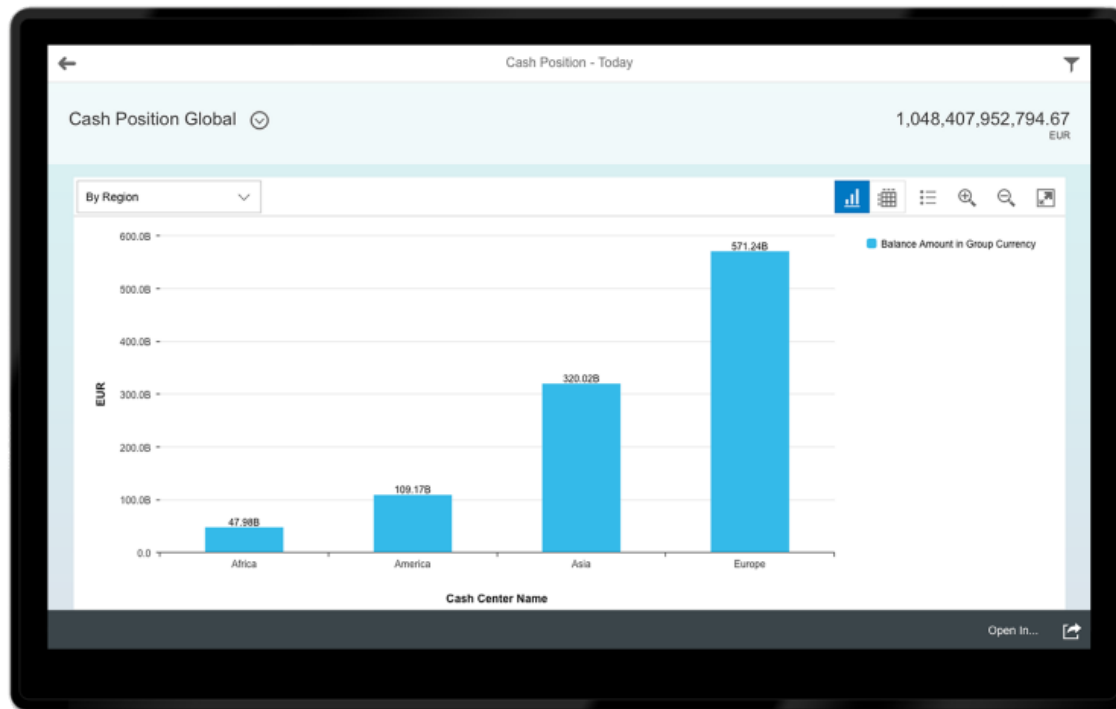

SAP S/4HANA is the digital core – the nerve center – of your entire business. It consolidates internal and external elements into a single, living structure that goes beyond traditional ERP. In other words, it connects all of your processes, provides you with live information and insights, and seamlessly integrates your enterprise with the digital world at large.

Manufacturing

## Consolidation

How can a large hotel chain connect disparate systems after multiple mergers and acquisitions? By using SAP S/4HANA Finance. With the software's central journal scenario and embedded analytics, booking information is calculated in real-time for one reservation, invoice, and journal entry.
