[Bootstrap version 3](#) has recently been released and I wanted to cover some useful and interesting Bootstrap tools and resources. If you are currently on [Bootstrap 2](#) or earlier versions, you might be interested in checking out Parashuram Narasimhan's post that covers [Bootstrap's evolution over the last 2 years](#). He also has a great [Bootstrap performance tool](#) that charts performance metrics for each Bootstrap component for each release. Also, if you are interested in seeing some great websites created with Bootstrap, I really like the [Built with Bootstrap](#) showcase of sites and apps.

Here is my list of top 20 Bootstrap tools:

[Bootstrap Grid Builder](#) – Jay Kanakiya's tool for exploring and generating column/row grids based on different devices (phone,

Search ...

tablet, or desktop).

[JetStrap](#) – premier interface-building tool for Bootstrap 3.

[LayoutIT](#) – layout interface for Bootstrap project.

[Bootstrap Live Editor](#) – A WYSIWYG Editor built for Bootstrap.

[bootstrap-wysiwyg](#) – tiny wysiwyg rich text editor for Bootstrap

[BootsWatch](#) – Free themes for Twitter Bootstrap

[Wrap Bootstrap](#) – Premium Themes for Twitter Bootstrap

[COSMO](#) – metro inspired theme based on bootstrap.

[ShoeStrap](#) – open-source WordPress theme that's based on HTML5 Boilerplate and Bootstrap from Twitter.

[StrapPress](#) – responsive WordPress theme with Twitter Bootstrap 3

[angular-strap](#) – Bootstrap for Angular.js

[Bootstrap CDN](#) – The recommended CDN for Bootstrap, Font Awesome, and Bootswatch.

[Twitter Bootstrap Button Generator](#) – quickly set up buttons based on Twitter Bootstrap.

Nice list!

You may also want to add <http://www.prepbootstrap.com/>, which contains many useful templates and themes, built with the latest Bootstrap.

Best,

Dave
