Functional Capabilities

Core Finance
Ensure financial compliance and drive revenue growth with integrated Core Finance processes. Leverage the latest tools for managing spend, optimizing resources, complying with financial reporting requirements, and more.

Streamline and automate financial operations while complying with regulations

Get real-time insight into overall financial performance

Integrate processes from various applications for a single version of financial truth

Reduce cost of goods sold (COGS) and maximize profitability

Analyze customer behavior and sales to quickly identify and seize new opportunities

Operate in multiple geographies, industries, and languages – simultaneously and in real time

Core Human Resources
Automate, streamline, and extend your Core Human Resources processes. Drive profitable growth by leveraging your employees' skills, while giving them every opportunity to achieve their career goals.

Automate employee administration, time management, payroll, and legal reporting processes

Support compliance with changing global and local HR regulations

Understand, evaluate, and measure your workforce's contributions to the bottom line

Attract, hire, and empower the right people – and bring new hires up to speed quickly

Pinpoint where your talent lies and train and cultivate your workforce

Align your employees' goals with your overall business objectives

Procure to Pay
Manage your purchases more efficiently – and maximize cost savings – with a centralized Procure to Pay system. Realize your purchasing power, enforce vendor choices, and optimize buying patterns – while negotiating better quotes, contracts, and conditions.

Increase visibility into purchase orders, contract management, and invoice handling

Reduce costs by lowering inventory levels and consolidating shipments

Maintain high levels of supplier and customer satisfaction

Optimize basic procurement processes – from requisitioning to invoicing

Improve processes for sourcing, inbound and outbound logistics, warehousing, and transportation management

Plan to Product

Streamline the entire manufacturing process – from planning, scheduling, and sequencing to execution and analysis – with integrated Plan to Product processes. Improve efficiencies, deliver higher-quality products, and boost profit margins.

Deliver the right products to the right place at the right time – every time

Respond to demand volatility by accelerating the planning process and facilitating fast changes

Identify and fix problems using real-time tracking and analysis

Reduce manufacturing costs, and ensure high product quality and regulatory compliance

Order to Cash

Increase sales, profit margins, and customer satisfaction by automating the entire Order to Cash cycle. Achieve perfect order management, improve on-time deliveries, cut costs, and more.

Manage the complete sales order lifecycle and all post-sales activities

Slash time spent on administration, confirming orders, and resolving late shipments

Drive sales by facilitating customer engagement across all sales channels

Request to Service

Provide real-time service and increase customer loyalty with best-in-class Request to Service processes. Differentiate your brand by delivering exceptional service across every channel profitably.

Understand and engage with your customers to exceed their expectations

Respond immediately to customer issues, and quickly resolve them

Streamline your service operations to increase efficiency and reduce costs
