Technical Capabilities

Platform

Because SAP S/4HANA, edition for SAP Business All-in-One is powered by our in-memory database, you can run optimized business processes at incredible speeds. The solution is built on the flexible SAP NetWeaver® platform, so you can seamlessly integrate both SAP and non-SAP software – now and in the future.

Integration Solutions

SuccessFactors SuccessFactors Employee Central goes beyond basic automation to deliver a suite of applications for your most demanding HR priorities. This core HR system (HRIS) is delivered securely via the SuccessFactors cloud, serving more than 27 million users.

Ariba Network

The Ariba Network allows you to connect and collaborate with trading partners through a single platform in the cloud. Right now, there are over 1.7 million businesses in over 190 countries on the Ariba Network – and it's growing all the time, giving you more business commerce opportunities than anywhere else.

SAP Hybris

Hybris offers state-of-the-art products for customer data management, context-driven marketing, and omnichannel commerce. Target and engage customers wherever they are – and boost sales and loyalty by using real-time data to deliver the best possible customer experience.

SAP Fiori User Experience

SAP Fiori delivers a consumer-grade user experience (UX) for SAP software – including SAP S/4HANA, edition for SAP Business All-in-One. Take advantage of an intuitive, role-based UX across all lines of business, tasks, and devices – for instant insight-to-action and sky-high user productivity.
